## Experiment 19 : Student, Teacher and Subject Code Using Prolog

**Aim:** To write and execute a Prolog program to store and retrieve student details, teacher details, and subject codes using facts and rules.

**Program:**

Save the program as exp19.pl in your C:\Users\yadal\OneDrive\Documents\ai folder.

```
% Student Details
student(101, ravi, ece).
student(102, priya, cse).
student(103, kumar, eee).

% Teacher Details
teacher(t01, anand, ece).
teacher(t02, meena, cse).
teacher(t03, ramesh, eee).

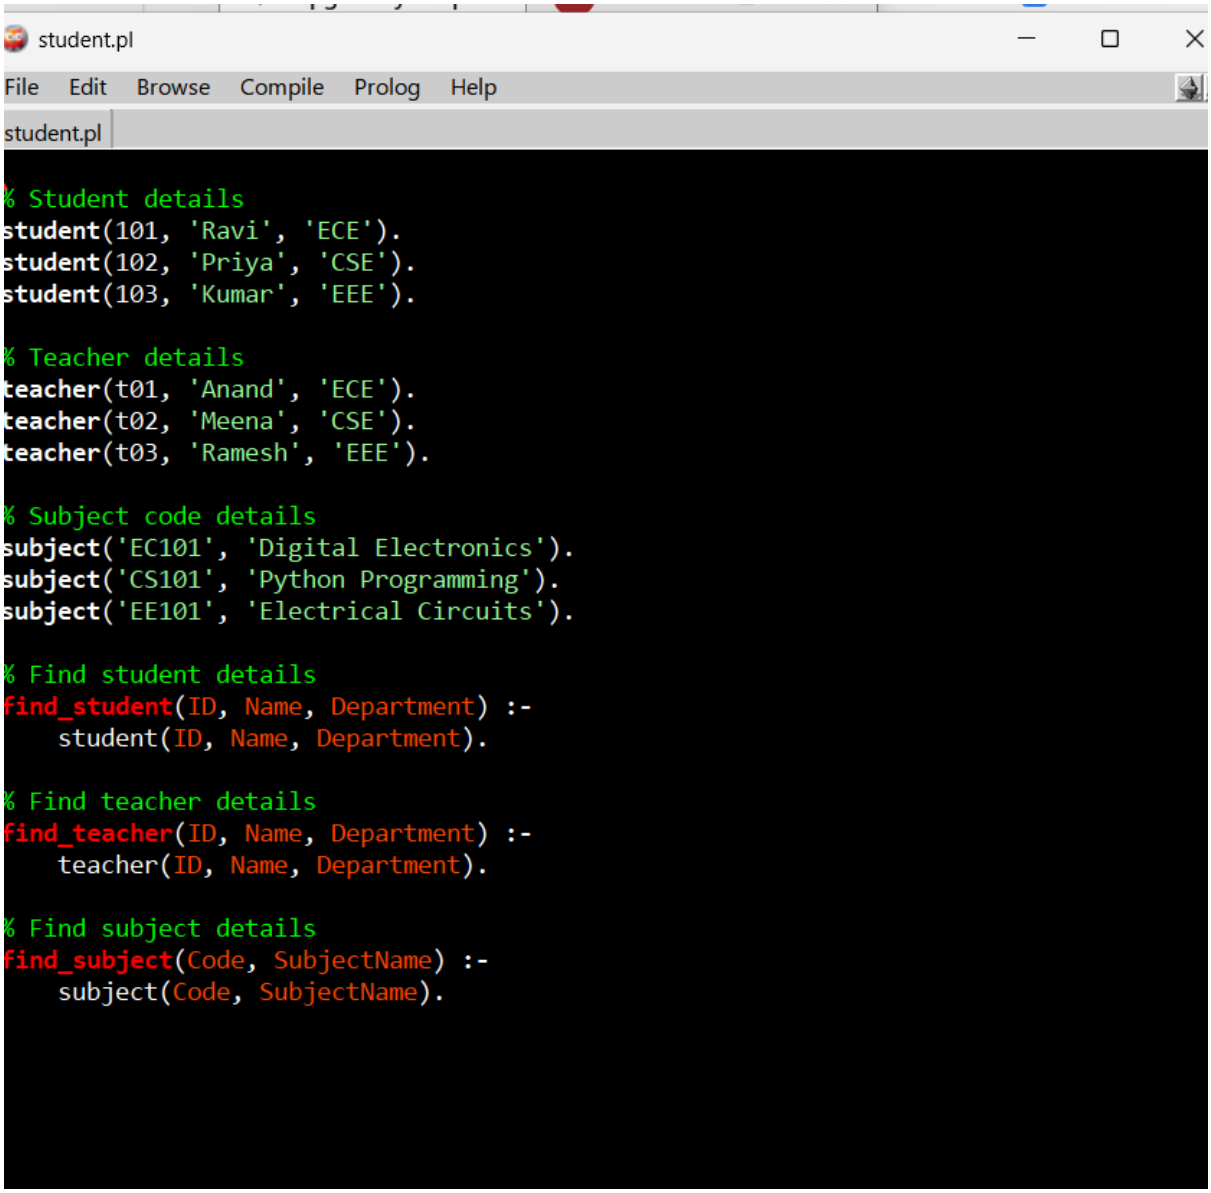

% Subject Code Details
subject(ec101, digital_electronics).
subject(cs101, python_programming).
subject(ee101, electrical_circuits).

% Rules
find_student(ID, Name, Dept) :-
    student(ID, Name, Dept).

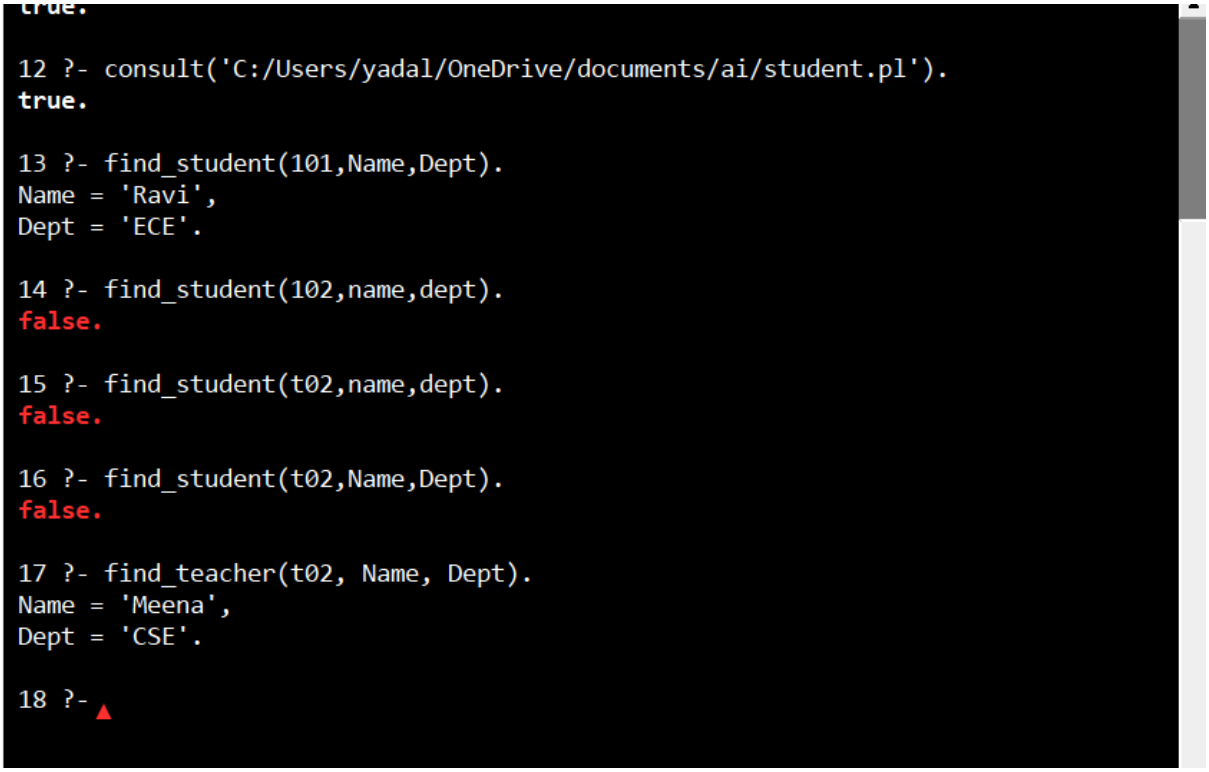

find_teacher(ID, Name, Dept) :-
    teacher(ID, Name, Dept).
```

find_subject(Code, Name) :-

subject(Code, Name).

**Execution**

**Result**

Thus, the Prolog program was successfully written and executed to retrieve student details, teacher details, and subject names using subject codes.
